

As a member of the Amateur Radio community I am worried about the effects of BPL on Hf communications. My call sign is N3IOD. I am also a member of Delaware Army MARS and am quite concerned about the effects of BPL on Emergency communicatios. I am the DE ASMD and my call is AAM3DE / AAT3GJ DE. Please take into account that we provide the back bone our nations emergency communications network. I hope that the need for our services never comes, but if it does we want to be able to do our job. Don't let BPL compromise our ability.

Thank you,

William A. Hammond, Jr.
